↑ 3 - Pivoting 1-light CS NewYorker doors.

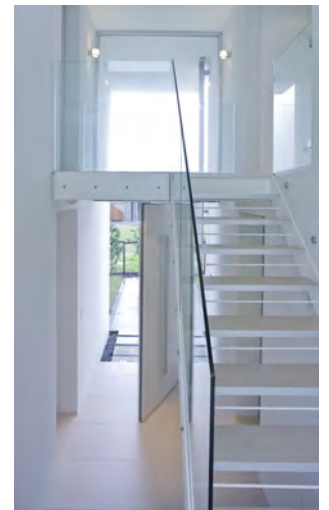

AutoPivot™

With 25 years experience in manufacturing sliding doors and a further 10 successful years in the automated door market, **CS FOR DOORS** offers a sophisticated range of automatic door systems - **CS AutomaticUnits**.

CS AutoPivot units are a modern alternative to conventional feature entry doors. Why manually push a heavy pivot door when you can use technology that will do it for you? This electrically powered unit will make moving that oversized door a lot easier. It's far more impressive too!

The CS AutoPivot is the ideal choice where a lasting impression is required.

The CS AutoPivot drive system is constantly being upgraded with modern interface capability, making this entrance way a techno's dream.

↑ 2 - CS AutoPivot 2.7H x 2.0W with secure access. Custom design and install.
