CS TrackSystems are an innovative range of track systems designed for a multitude of sliding doorway applications.

CS BarnDoorTrack is suitable for surface sliding applications where there is enough strength in the wall to side mount a track above an opening. It is designed to offer adjustability of the door out from the wall. This allows for clearance with baseboards and casings without an unsightly head spacer.

Installation is quick and easy as the track bracket is supplied with pre-machined fixing slots. The track is pre-finished black anodized and supplied with fixing bracket, stops, door hangers and T-Guide.
