CS TrackSystems are an innovative range of track systems designed for a multitude of sliding doorway applications.

**CS FH-CeilingMount Track** is supplied with full-length fins that enable the ceiling lining to be fixed flush with the underside of the track. This ensures the continuation of the ceiling-line through where the door slides. The track can also be painted on site to match the ceiling color.

FH-CeilingMountTrack can be upgraded to SofStop® soft close. This is suitable for areas where quiet is required, such as bedrooms, offices and patient rooms.

**AVAILABLE WITH:**

SofStop® Soft Close / Soft Open

*Single FH-CeilingMountTrack in a corner meeting pocket door setup.*
Technical Information

Suitable for large room dividers or surface sliding applications.*

Track can be configured to suit Bi-Parting door set-ups, including CornerMeeting detail.

304 stainless steel components available for corrosive environments.

Track may be painted on site to match ceiling color. (See data sheet on our website).

*Not suitable for use in a pre-fabricated pocket frame. You will need to build a wall either side of the track when using in a pocket application.

Standard Features & Options

- Single Standard Features & Options
  - Suitable for large room dividers or surface sliding applications.*
  - Track can be configured to suit Bi-Parting door set-ups, including CornerMeeting detail.
  - 304 stainless steel components available for corrosive environments.
